

Logo

The Snowflake logo of Winter CMS has been touched up to join the inner edges of the flake together into a sharper star shape. It uses the **Accent 500** colour, as this can be used on both light and dark areas.

On top of looking like a more congruent shape, it symbolises Winter CMS itself better - the outer arms of the snowflake being softer to represent that Winter is easy on the outside, but strong and sharp on the inside.

The wordmark remains unchanged.

The combination of the wordmark and the logo has been slightly adjusted to make the logo bigger, so that the center of the protruding arms on the right matches the height of the wordmark, to make it look more deliberately sized to the wordmark, complimenting it further.
